# Project Summery

**( 1 ) Laundry Management System (For Laundry Service)**

I joined Cyber Wings co.,ltd at the final year of my university fro my internship program as a web developer so I've developed a laundry management system.

It includes

- User registration system
- User cash deposit modules – User need to deposit the cash before ordering
- User ordering system – the users can select the items and add to basket lists and also change them before ordering
- After if the items are ready for collection then the system will notify the user with a sweet alert
- Order history modules for User– users can check their order histories
- Order history modules for Admin - Admin can review daily sale records in the system
- Order list module - Admin can see total order lists in the system
- Wash list module – Admin can adjust the wash lists whether the order is finish or not
- Deliver list module – Admin can manage the delivery lists
- Report module - Generating reports daily, monthly and yearly

## ( 2 ) Property Star (Properties Website in Yangon)

Property Star Real Estate is serving Condominium, Landed Houses, Lands, Industrial, Warehouse Properties in Yangon, Myanmar. We are the best real estate service in Myanmar with ethics, integrity, professional attitude, and personalized care.

### Front-end Function and Module

- Customers can search the property by filtering property type, City, township, price, etc..

- If the customer interested in the property who can contact our agent. Then property star will do all paperwork processes.

### Back-end admin module

- Property Module - Admin can add, delete, update all property listings

- Transition Module - Admin can record all the property transitions for both sale or rent. Admin can record the daily costs of the company then the system will auto-calculate monthly profits and loss

- Subscribers Module - Users can subscribe to the system then the system will send email latest listings to users weekly

- Testimonial Module - If customers like to give the testimonial so they can submit to the company the admin can create a testimonial

- Popular Search Module - System will automatically record what is customer movement or click action on the website then will calculate what properties are the most view. The most customer seeing property will appear as popular properties

- My Profile Module - Agent can update their personal detail such as an address, contact number, email

- Transaction Module - Agent can manage their transactions (sale or rent) individually or team

- Listing Module - Agent can manage their listings (sale or rent) individually or team

**Mr. Thet Tun**

- Promotion Module - If agent reached the target amount within a year, the system will automatically calculate for promotion and will notify to the Commission Module - System will calculate commission for each agent on monthly basis and will add to the salary package

- Testimonial Module-If customers like to give the testimonial so they can submit to the company the admin can create a testimonial
