Dear HR Manager,

I am very interested in this position as I believe that my background and qualifications are just what you are looking for. I matched my qualifications to those requested in your advertisement.

My name is Thet Tun, I have graduated from the university of computer studies, meilkhtila in August 2018. My specialization is computer science and it took me 5 years to complete my degree. In my university, I have studied Html5, css3, jquery, Ajax, Java, C#, asp.net, PHP, MySQL, Microsoft SQL, and Oracle database. I have written some outsource projects since I was studying third years. So I have about 4 years of hand-on coding experiences. I have strong self-driven skills and like to learn new technologies. I have been working as a full-stack web developer and also as a Node.js instructor in ITVISIONHUH co., Ltd. In this company, I have been taught 6 students and developed the ITVISIONHUB website (http://itvisionhub.com) and the following websites.

Property Star - http://propertystardb.com
Listening db - http://www.listingsdb.com
Personal Website(Portfolio) - http://thettun.com

I have a strong knowledge of project management, object-oriented programming, and database management system. Good experience in developing Software using ,PHP, Node Js, PHP Framework(Laravel), Vue.js, MSSQL, Web Service, RESTFUL API, AJAX, JQuery, MPU, 2P2C Online Payment System, JavaScript, Html5, CSS3, MongoDB, Git version control System Github and Gitlab, UML Modern, software development life cycle (SDLC), UML model and Scrum , Kanban in Agile methodology.

At my internship program, I developed laundry management system with my university friends. This system is a class of web-based systems and stores large amounts of clothes data information. By using this system, the user can check their estimate price before they order. In this system, the developer classifies two-level by checking user name and password.

Laundry Management System - http://laundry.zwelab.com

I'm good at an analytical skills, self-esteem, eager to learn challenging technologies and able to solve problems. Adaptable with teamwork or individual I provide full lifecycle support to clients from initial client interaction and requirements analysis through design, coding, testing, debugging, implementation and integration.

Best Regards,
Thet Tun
